CYBEREASON MDR

At the Frontline of Defense

KEY BENEFITS

» Optimize security operations and reduce TCO

» Faster outcomes with 24x7x365 proactive threat hunting

» Reduce enterprise security risk and time to response with zero-false positives to you

» Fully hosted and managed by Cybereason - Active and operational-ready in minutes

"Cybereason has the strategy, expertise, and technology to analyze and defend organizations by preventing and containing threats... from ransomware to large nation-state scale data breaches."

DIRECTOR OF SECURITY, LARGE MULTINATIONAL FINANCIAL SERVICES

PUT CYBEREASON MDR TO THE TEST

CYBEREASON.COM/MDR →

Security teams of all sizes and maturity levels are struggling with the volume of cyber attacks, disparate tools, and often too few staff to address the workload. Cybereason MDR, powered by the Cybereason Defense Platform and operated by battle-tested defenders, is here to help you solve these key challenges faced by your security team on a daily basis. Allowing you to focus on what matters most and not incurring additional overhead costs to protect your organization.

BEST RESPONSE - EVERY TIME

Cybereason MDR handles a broad array of threats across all endpoints, only escalating the most important threats to your team. Our team is built to operate as one unit, armed with leading technology to prevent, detect, hunt, and respond to threats 24x7x365. From real-time root cause analysis to automated compromise containment, Cybereason's team works to reverse the adversary advantage. Cybereason MDR prevents cybercriminals from taking advantage of and obtaining access to the enterprise network, systems, and most importantly - your data.

Cybereason understands business continuity is critical to your continued growth and success, and we are ready to help manage security operations with your team, or as extension of your security team. We are not your typical tactical closed box managed service, but one that partners with our clients, built on trust and transparency to grow and mature your security program, while actively reducing risk of breach.

AUTOMATE THE HUNT

Cybereason MDR stays ahead of the adversary by eliminating blind spots traditional technologies and security teams miss. The Cybereason Defense Platform automatically handles traditional hunting with MITRE ATT&CK alignment so our team can then spot unique, sophisticated threats. This reduces the time to remediate and uncovers more dangerous threats. One vendor's proactive hunting is simply Cybereason tech applying automated offensive threat hunting techniques. With Cybereason MDR, our Defenders are an extension of your team, regardless of size, maturity, or task-at-hand, hunting at unprecedented speed and scale.

BATTLE-TESTED DEFENDERS STANDING BY

Cybereason brings a wealth of knowledge and proven expertise into your daily operations. The Cybereason Defenders, backed by the world-renowned Cybereason Nocturnus research team, brings an offensive-security mindset and access to knowledge, tools and resources built from decades of experience. With access to threat hunters around-the-clock, you are empowered to outmaneuver sophisticated adversaries that leverage malware, spyware, and ransomware, as well as more advanced attacker techniques, and continue to mature your security operations program.

While protecting our customers is our first priority, instilling confidence in security management and inspiring security operation teams to mature their security program is key to the partnerships we foster with our clients. Powered by the Cybereason Defense Platform, Cybereason Defenders are equipped to contain, eliminate, and root out threats across your on-premises, remote, and cloud-operated environments.

ACCELERATE SECURITY ANALYTICS. THE CYBEREASON WAY.

Not all managed detection and response solutions are created equal. Getting MDR right requires a combination of advanced technology built on a powerful security analytics platform with response-driven automated processes and the right security expertise. Together, we help you shift your cybersecurity program to proactive threat detection and response while minimizing your security risk.

» At a scale of **8 million automated hunting queries per second**, the Cybereason Defense Platform gives a true real-time view of both your environment and the attacker timeline.

» In the Cybereason Defense Platform, disparate attacker activities are automatically joined to form a complete compromise campaign timeline, resulting in **a single malicious operation -- a Malop™.** This gives all the context you need across all steps of the attack lifecycle to contain and remediate, which is why our team is able to **complete analysis, triage, and tactical remediation recommendations in an average of 35 minutes.**

» Reduce IT complexity via a single lightweight agent with a **do-no-harm approach** to your endpoints or the network.

INCIDENT RESPONSE READY

When seconds matter, you want to move fast. Cybereason MDR includes a pre-negotiated Incident Response Retainer to establish terms which help to speed response time and limit compromises from enterprise-wide spread.

TAILORED FOR YOUR ORGANIZATION. UPLEVEL YOUR TEAM.

Cybereason MDR enables your team, however advanced, to deal with the increasing workload and threat volume. We help your team shift from reactive monitoring to proactive security operations. Leverage the Cybereason Defenders based upon your specific requirements;, from tier 1 malware and forensics experts to incident responders standing by to aid in co-managed remediation, collaboration on hunts, or even complete response to active threats.

 Cybereason MDR's 500+ global customers **benefit from our around the clock, follow-the-sun model, with 24x7x365 support.** We stand ready to detect, prevent, investigate and act against threats, from known malware to advanced or unknown threats, all working to protect your organization and improve your organization's security posture.
